

The Protect Our Children Act

A Common-Sense Plan to Secure Our Kids' Future

The Goal: Every parent deserves the peace of mind that their child is safe—online and in our neighborhoods. The “Protect Our Children” Act moves us from just talking about the problem to actually fixing it. We are treating child safety as our highest priority, building a protective shield around our families while providing a path to healing for those who have been hurt.

I. The “Safe-Tech” Initiative (\$50 Billion)

Keeping the internet a place for learning, not predators.

- **Real-Time Protection (\$15B):** Modernizing our tech to instantly flag and block known predatory behavior on social media before it reaches a child.
- **Verified Safe Zones (\$10B):** Working with tech companies to ensure “kids-only” apps and games are actually for kids, using high-security privacy tools that keep adults out without compromising your personal data.
- **The Privacy & Safety Breakthrough (\$25B):** Investing in American innovation to protect your private messages while creating a “safety-lock” that only opens if a child’s life is in immediate danger.

II. Supporting Our Heroes & Fixing the Courts (\$40 Billion)

Giving law enforcement the tools they need and making courts work for victims.

- **Local Child-Safety Units (\$20B):** Putting 10,000 new, highly-trained specialists in our cities to hunt down traffickers and stop threats coming from overseas.
- **Family-First Justice Centers (\$10B):** Building 500 friendly, safe locations where children can tell their story to a judge without the fear and intimidation of a cold, crowded courtroom.
- **The “Stand Up” Reward (\$10B):** Providing major rewards for whistleblowers who help take down large-scale criminal rings.

III. The “Pathways to Success” Fund (\$40 Billion)

Ensuring that every survivor has the chance to thrive.

- **Lifetime Success Accounts (\$25B):** We’re providing survivors with a “Success Bond” that covers 100% of their healthcare and a full scholarship to any college or trade school. We aren’t just helping them survive; we are helping them lead.

- **Community Healing Centers (\$15B):** Building safe, high-security neighborhoods where survivors can get top-tier medical care and schooling while they get back on their feet.

IV. Empowering Parents & Schools (\$14 Billion)

Giving every American the “Internet Self-Defense” tools they need.

- **Smart-Kid Curriculum (\$6B):** Helping schools teach kids how to spot online scams, “catfishing,” and bullying—giving them the skills to stay safe in a digital world.
- **Local Training Grants (\$8B):** Giving our teachers and doctors the training they need to spot the warning signs and help kids in trouble before it’s too late.

V. Holding Big Tech Accountable

We believe in a free market, but not at the expense of our children. Any corporation that repeatedly allows the exploitation of minors will lose its right to do business in the U.S. Their assets will be seized and used to fund the recovery and education of the children they failed to protect.

“No child left behind. No predator left unpunished. No survivor left without a future.”

The “Safe Childhood” National Initiative

Total Budget: \$144 Billion (Funded entirely by Big Tech profits—**\$0 Taxpayer Dollars**)

1. Give Parents Back Control (\$40 Billion)

- **The “One-Click” Reporting System:** A universal, easy-to-use button on every app that sends a report directly to a local human trafficking task force, not just a company’s automated bot.
- **Unmasking Predators:** Funds a national “Verified ID” system for adults on social media, so children aren’t interacting with anonymous “ghost” accounts.
- **Digital Self-Defense for Schools:** Simple, non-scary “Internet Safety” classes in every K-12 school to teach kids how to spot a “tricky person” online.

2. Local Boots on the Ground (\$40 Billion)

- **A Predator Task Force in Every County:** Direct funding to your local Sheriff and Police to hire specialized detectives whose only job is to hunt online predators and rescue local children.

- **Ending the “Backlog”:** Hiring more forensic experts to process the mountains of digital evidence that currently allow predators to stay on the streets for years while awaiting trial.

3. Real Justice for Victims (\$40 Billion)

- **The Survivor’s Scholarship:** Every rescued child is guaranteed a 100% “Full Ride” to any college or trade school, plus lifetime healthcare and mental health support. We don’t just rescue them; we set them up for a successful life.
- **Child-First Courts:** No more making 10-year-olds testify in front of their abusers in scary courtrooms. This builds “Healing Centers” where kids can tell their stories to a friendly face in a safe, comfortable room.

4. The “Zero Tolerance” Tech Law (\$24 Billion)

- **The Corporate “Death Penalty”:** If a social media company is caught knowingly ignoring child exploitation, they don’t just get a fine—they get shut down. Period.
- **Whistleblower Rewards:** Offering life-changing rewards (like \$10M+) for any tech employee who exposes “black box” algorithms that they know are putting children in danger.
