[An American Government Not Owned by Billionaires](#)

Goals of the 99%

[We Are The 99 Percent](#)

Apr 26, 2026

Our GOAL is a comprehensive blueprint for a “people-first” government. It serves as a roadmap or a legislative platform designed to show how we can move past partisan gridlock and corporate influence to solve the actual problems facing American families today.

Specifically, the message aims to:

- **Restore Trust in Democracy:** By banning lobbyist influence and modernizing how we vote (Ranked Choice and Secure Online Voting), it aims to make the government accountable to voters rather than donors.
- **Unburden the Middle Class:** It outlines a strategy to lower the cost of living—targeting housing, taxes, and wages—to ensure the “American Dream” is a mathematical reality for working families, not just a slogan.
- **Strengthen National Resilience:** It proposes reclaiming wasted government spending (like at the DoD) to protect our most vital resources: our water, our local food supply, and our family farms.
- **Ensure “Blind” Justice:** It demands a legal system that treats everyone equally, using data and transparency to eliminate economic and systemic biases so that justice is never determined by a bank account or background.

Essentially, this is a roadmap for **reclaiming the American government** and refocusing its massive resources on the safety, prosperity, and independence of its citizens.

What We Want For You

We have to look at the “**Kitchen Table**” reality: most Americans today feel that the system is working for someone else—not them. This plan is designed to flip that script by putting you back in the driver’s seat of your own life and country.

1. It Puts Your Vote Over a Lobbyist’s Checkbook

Right now, many feel their vote doesn't matter because "Big Money" buys the outcomes. By banning lobbyist fundraising and introducing **Ranked Choice Voting**, this plan ensures that politicians have to earn your support rather than just "buying" it. It ends the "lesser of two evils" trap, giving you the freedom to vote for who you actually want.

2. It Makes the American Dream a Math Reality

We've all seen prices at the grocery store and the gas pump climb while wages stay flat. This plan doesn't just talk about the middle class; it targets the **actual math** of your life:

- **Lowering Housing Costs:** By stopping Wall Street from buying up family homes, it makes homeownership affordable again.
- **Tax Relief:** It doubles the standard deduction, meaning more of your paycheck stays in your pocket before the government ever touches it.

3. It Stops Wasting Your Hard-Earned Tax Dollars

Most of us are tired of hearing about "government waste." This plan performs a "Common Sense Audit" on our spending. Instead of trillion-dollar "use-it-or-lose-it" spending sprees at the Pentagon, it reclaims that money to protect the things you actually use every day: **clean water, local food supplies, and family farms.**

4. It Guarantees a "Blind" Referee in the Legal System

Justice shouldn't depend on how much money you have in the bank. By using "**Blind Charging**" and ending the "pay-to-stay" fee system, this plan ensures that the law treats a CEO and a construction worker exactly the same. It restores the basic American promise that the rules are the same for everyone.

Our Future Together

If the USA moved in this direction, it would trigger a "virtuous cycle" where the success of the individual and the success of the nation finally pull in the same direction.

Here is how this path would transform the entire country's future:

1. A Rebirth of Civic Energy

Currently, millions of Americans "opt out" of the system because they feel their voice is drowned out by money.

- **The Benefit:** By removing lobbyist influence and using **Ranked Choice Voting**, we unlock a wave of new ideas and leaders. When people see that their vote actually

changes their daily reality, participation skyrockets. This creates a more stable, less polarized country because leaders have to appeal to the **majority of people**, not just the loudest donors.

2. An Economic “Main Street” Boom

When you stop Wall Street from outbidding families for homes and double the tax deduction for workers, you create a massive “bottom-up” economic engine.

- **The Benefit:** Money that was previously frozen in corporate savings or spent on high rent starts circulating in **local economies**. This fuels small business growth, increases the birth rate (as young families can finally afford homes), and creates a more resilient middle class that can weather global economic shifts without needing government bailouts.

3. National Security Through Self-Reliance

By auditing wasteful “lobster tail” spending at the Pentagon and redirecting it to **water, food, and family farms**, we secure our foundation.

- **The Benefit:** A country that can feed itself locally and protect its own water supply is a country that cannot be bullied on the world stage. We move from “global fragility” to “**national resilience**.” Our infrastructure becomes an asset that lasts for centuries rather than a liability that is currently crumbling.

4. Restored Faith in the Rule of Law

When a “Blind” legal system treats the powerful and the powerless the same, the social fabric mends.

- **The Benefit:** High levels of “social trust” are the secret ingredient to the world’s most successful nations. When citizens believe the “referee” is fair, they are more likely to innovate, cooperate, and invest in their communities. We end the era of “two Americas” and return to being **One Nation** governed by a single, fair set of rules.
